

DISPENSER HORIZONTAL

SKU: S3-0073.01/02

27.500,00 € excl. VAT

Categories: [Dispensing systems](#), [Modules](#)

BESCHREIBUNG

The Dispenser Horizontal makes it possible to jet non-scratchable dispensing materials from the side. This is fixed to the base plate on the machine and allows contact-free dispensing of low, medium and high viscosity materials. The component located on the processing head is horizontal coated. Due to elimination of the needle feed movement, the dispensing speed is increased, thus optimizing the cycle time. To ensure a smooth dispensing process, an integrated material heating heats the dispensing material to the optimum process temperature.

MORE INFORMATION

Dimensions in mm (W x D x H)	260 x 110 x 135
Weight in kg	2.7
Cartridge holder SEMCO	10 cc , 5 cc
Communication interface	UNICAN

Häcker Automation GmbH
Inselsbergstraße 17
99880 Waltershausen / OT
Schwarzhausen
