33.600,00 € excl. VAT

Categories: [Feeding equipment](#), [Modules](#)

BESCHREIBUNG

The conveyor with step belt transports substrates within a machine or from machine to machine. It consists of three segments – an input area, a processing area and an output area. Each segment is equipped with a stopper to carry out the transport in separate steps.

With a transport length of 1,500 mm, the conveyor is suitable for OurPlant XTec machines.

The conveyor can be adapted to different workpiece widths depending on the application. For this purpose, it is equipped with an automatic width adjustment with an own drive.

The Conveyor with step belt is recommended for very thin and delicate substrates.

The conveyor also has a SMEMA interface.

MORE INFORMATION

Length in mm	1,500
Width in mm	50 ... 180
Width adjustment	automatic
Type	OurPlant XTec
Type of belt	step belt
