	78-0088 + 20-2338 static integration set		33.000,00 € excl. VAT

## BESCHREIBUNG

The Jedec Tray Feeder from Quasys is a flexible feeding solution for jedec tray magazines. Without any interruption of

the assembly process the feeder separates thick or thin trays (standards 95-1 & IEC 60286-5) and transports them to the working area of the machine.

The mechanical integration set is used to mount the Jedec Tray Feeder in the machine. The conveyor of the feeder reaches into the machine while the magazin section is located outside the machine.

The static integration set should be used if the Jedec Tray Feeder is to be mounted on the left or right side of the machine. Otherwise (mounting on the front or back of the machine) the extensible integration set should be used. With this option, the feeder can be pulled-away from the machine so that the electrical cabinet of the machine can be opened.
