

MACHINE EXTENSION 19" RACK WITH ENERGY CHAIN

SKU: 20-2125-1

1.500,00 € excl. VAT

Categories: [Machine extension](#)

BESCHREIBUNG

The 19" rack is a special mounting bracket in the machine's housing. This rack can accommodate, for example, control units for specific modules that don't serve a specific purpose on the base plate and need to be housed separately due to space constraints. The rack with energy chain is necessary when control units, etc., for machining heads need to be housed separately. The energy chains ensure proper cable management during operation.
