

MACHINE EXTENSION RACK 19"

SKU: 20-2125
700,00 € excl. VAT

Categories: [Machine extension](#)

BESCHREIBUNG

The 19" rack is a special mounting bracket in the machine's housing. Control units for specific modules, which don't serve a specific purpose on the base plate and must be housed separately due to space constraints, can be accommodated in the rack. The rack can only be used for control units, etc., belonging to fixed modules, i.e., not for machining heads.
