

MACHINE EXTENSION SMEMA TRANSPORT HEIGHT OPTION

SKU: 20-2232

2.100,00 € excl. VAT

Categories: [Machine extension](#)

BESCHREIBUNG

With the standard machine feet on the X3, a maximum transport height of only 909 mm is achieved. To reach a transport height of at least 910 mm, it is therefore necessary to attach appropriate shims under the machine feet. These shims allow the transport heights to be achieved according to SMEMA standards. This option includes four sets of shims, each with four different thicknesses. The shims can be combined as needed. This option allows for an increase of 100 mm. If a further increase is required, individual shims can be ordered separately.
