

MEASURING EQUIPMENT PRECISION BALANCE

SKU: S3-0076
5.080,00 € excl. VAT

The precision balance is used for process control during dispensing.

Categories: [Accessories](#), [Measuring Equipment](#), [Modules](#)

BESCHREIBUNG

The precision balance is used for process control during dispensing.

Before starting the dispensing process, a certain amount of dispensing material can be dispensed into a drip tray on the balance. Thus the accuracy of the dispensing head is determined. After this determination the dispensing process on the substrate can be proceeded.

The DGUV3 test protocol and a factory test protocol are included in the scope of delivery.
